HOW TO GET SPECIFIC RISK DATA FOR YOUR COMPANY

By 2020, the Australia Federal Government will require companies to disclose Modern Slavery Reports*

The challenge here is usual data sources are often limited, making credibility a huge concern.

But with Robobai's AI powered Modern Slavery Module, getting credible and accurate analysis of your supply chain is not a problem.

We do this by using 3 key Risk Lenses that sifts through:
Supplier company profiles
Countries of origin
Product categories

You will have credible data sets presented in an intuitive dashboard that provides High, Medium, and Low risk profiles across the spend base.

With comprehensive supply chain data, you'll be able to accomplish government requirements but also secure your company's reputation from the damaging effects of being involved in Modern Slavery.

companies with over $100M revenue; over $50M revenue for NSW
